005 564	O 564	55ml	6	4900669 055648
005 464	O 464	200ml	3	4900669 054641
005 364	O 364	500ml	1	4900669 053644

*Holbein Painting Oil Medium (Poppy Oil Based) is available while supplies last.

Differences in yellowing between different drying oils

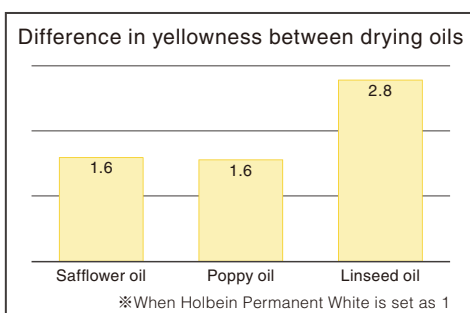

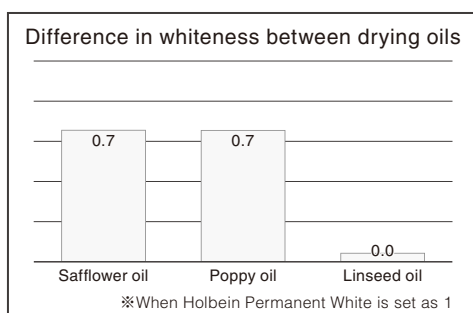

Permanent White SF Safflower oil Poppy oil Linseed oil

The degree of yellowing was photographed after 2 months of application of a 2:1 mixture of white (Holbein Permanent White SF) and different oils, which is the easiest way to see yellowing difference. There is little compositional difference between poppy oil and safflower oil, and visual inspection confirms that there is no difference.

■ Colorimetric Results

The color difference $[\Delta E]$ (Delta E) value, which indicates the difference in color, is $\Delta E=3.92$ for Safflower Oil and $\Delta E=3.75$ for Poppy Oil, using Permanent White SF oil paint as the standard value, a difference that can be considered an error.

Whiteness & Yellowness Comparison Graph

The following graphs show the whiteness and yellowness of the two oils. Comparing Holbein Permanent White SF as 1, we can see that there is little difference between Poppy Oil and Safflower Oil.
