

Notification of Color Hue Change for Holbein Artists' Watercolor “Cobalt Turquoise Light”

We are announcing a necessary change to the color formulation of our Holbein Transparent Watercolor Cobalt Turquoise Light.

This change is due to current difficulties in sourcing the cobalt blue pigment (PB28) used in its production.

The new formulation will have a stronger yellow tone compared to the previous product. This revised color tone and pigment will align with the similarly named colors across our other lines, such as our Pan Colors, pigments, and oil colors.

The new specifications will be rolled out as follows:

5ml / 15ml size: Starting with Lot No. 16

60ml size: Starting with Lot No. X5
